

Aerial Bartending

Biography Where Gravity Takes a Sip

Welcome to our celestial corner of libations and levity! At Hands On, we've taken bartending to new heights—literally. Picture this: our elegant aerial bartenders suspended in mid-air, pouring bubbly beverages from above—like celestial mixologists with a dash of Cirque du Soleil flair.

Why Aerial Bartending?

Gravity-Defying Elegance: Our beautiful aerial bartenders don't just pour drinks; they create an experience. Whether it's champagne, wine, a signature cocktail, or even a non-alcoholic libation, they'll serve it with style and grace. Suspended and spinning in the air, they're like liquid magicians, making your event unforgettable.

Chandelier Chic: Imagine a classic chandelier, bedazzled with sparkling crystals and wrapped in LED panel lights. Now add a modern twist: two high-flying hostesses pouring champagne for your guests from this luxurious, celestial fixture. It's elegance meets innovation—a visual feast for the eyes.

How It Works

Rig Off the Grid: If you have an existing structure with a minimum ceiling height of 4 metres, we'll rig from there. Our professional team ensures safety and seamless installation.

Full-Size Aerial Rig: No structural rigging? No problem! Our portable, free-standing aerial rig fits into various spaces. Silks, lyra, or chandelier—your choice!

Freestanding Aerial Hoop: For a smaller footprint, consider our lollipop lyra. Just 1.8m by 1.8m round space and approximately 3.4m ceiling height, and voilà—an aerial bartender in less than 30 minutes!

What People Say

Our clients rave about the aerial bartenders at their events. It's that unexpected touch

that leaves everyone talking.
